Profile summary

Motivated and adaptable IT graduate with a Diploma in Software Development from the IIE, equipped with a foundation in computer literacy and programming. Passionate about software development, whether frontend, backend, or full stack, willing to learn and apply knowledge in real-world settings. Brings a learner's mindset, problem-solving abilities, and a commitment to growing within the ever-evolving tech landscape. Please refer to the GitHub links for the projects I have done. Experience

August 2024 – Present

EconArch Consulting and IT Services (Pty) Ltd

Intern – Support & Data/AI Teams

- As a member of the support team, I assist in providing technical support for specific Microsoft products such as Outlook, Teams, and the Microsoft cloud organization platform. This includes tasks like creating policies in Intune, monitoring security with Microsoft Defender, enrolling devices, and contributing to overall system management and troubleshooting.
- As part of the Data and AI team, I leverage my foundational knowledge in software development along with Microsoft Data and AI tools to contribute to both internal and external projects. This includes collaborating on the design and development of solutions that improve operational efficiency and support the organization's data-driven initiatives.

February 2024 – January 2025

Netcampus (Microsoft Training Partner)

Learnership Program Participant – Microsoft Data & AI Track

- Successfully completed a comprehensive 12-month Microsoft-certified learnership program focused on Data & AI technologies, including Azure Data Fundamentals and AI fundamentals.

Skills

Technical Skills

- Software & App Development: Fundamental knowledge of **Java**, **C#**, **ASP.NET**, **Kotlin**, **JavaScript**, **HTML**, and **CSS** for building web and mobile applications.

- Database & Cloud Platforms: Fundamental knowledge on **MySQL**, **Oracle**, and **Azure SQL**; hands-on experience with Microsoft Azure services, including Azure AI and cloud environment management.

Professional & Interpersonal Skills

- Collaborative & Analytical: Problem-solving abilities with a proactive mindset, comfortable working in team-based environments and communicating effectively with clients.
- Growth-Oriented: Committed to continuous learning, with a focus on expanding skills in Programming, and Database administration, while applying project management principles in real-world settings.
